Subject: ACTION: Draft statement: Jacksonville water issue

At TCEQ's request, EPA laboratory staff analyzed samples from the Craft-Turney water system for the chemical methylene bis-thiocyanate, found in the fungicide that reportedly contaminated the water system. The chemical was not detected in any of the 35 samples that were analyzed, shown in results on Friday, October 12.

Please work with Jim Brown in WQ to craft a statement.

Diane

Subject: ACTION: Jacksonville water issue

I have voicemails from the CBS and ABC affiliates in Tyler about the fungicide water issue in Jacksonville. Do we have a statement?
